

STEVE ROBERT

Hong Kong SAR

iOS Software Engineer - Freelance

Creative and passionate about new technologies, the field of mobility, its uses and the changes it causes in our society, I decided to devote myself mainly to the development of mobile applications on iPhone and iPad.

Experiences

SFBX / 2020 - Currently

Development of a CMP (Content Management Platform) as an iOS Framework (XCFramework) in compliance with the IAB France RGPD (General Data Protection Regulation) guide. The deliverable allows SFBX clients to incorporate the CMP into their applications so that users can give their consent. <https://sfbx.io/fr/>

Donna / 2018 - 2020

Development of an iOS mobile application focused on associations and clubs. Goals: To simplify the organisation, to simplify the collection of money in the associative environment and to centralise the information. <https://www.harvey.fr/donna/>

Airudit / 2017

Development of a mobile application « MVP » (Minimum Viable Product) - Mairie Virtuelle - for the company Airudit present at CES in Las Vegas in January 2020. <http://www.airudit.com/>

Spoconline / 2016 - 2018

Development of iOS mobile applications, and servers in Node.js for the company Spoconline based in Guadeloupe. Beaweez: Application for broadcasting content, tourist sites, shops via the deployment of a network of Beacons. Zattoo: iPhone and iPad (kiosk) application for loyalty cards via QRCode scanning. <http://www.spoconline.fr/>

Snapp' / 2014 - 2016

Development of iOS mobile applications for e-commerce in collaboration with the Bordeaux company Snapp'. (Tagawine, Fidme, 1Jour1Vin, HôtelB&B, Delamaison, Abbvie). <https://www.snapp.fr/>

Other

I regularly give online iOS development courses for individuals or for students taking OpenClassRoom courses.

Skills
